### List of Lining Out Stock Grafts, Rooted Cuttings For Spring 1942

Gentlemen:

I herewith send you my list of lining out stock for Spring 1942.

There is a good assortment of both fresh and one or two year old cuttings and grafts. I'd like to draw your attention to the item of one year grafts from 4" pots which will make ideal stock to set out as it has been outside since last Summer and has a small ball of earth which makes it sure to take. There are also many varieties of Yew all hardy and in many sizes, and many other items and plants of interest.

A few years ago I introduced two new varieties of Yew of a very good quality. Read the description under the listing of Yews and try some.

Please give me a trial order if you have not already bought from me before. I will serve you right.

Yours truly,  
JOHN VERMEULEN.

FRANKLINIA (Gordonia):	This is one of the best flowering trees in the garden. Its pure white flowers with its yellow stamen stand out clearly against the shiny green foliage which turns a beautiful Autumn red. The flowers are very fragrant and appear from early August until frost. It transplants well, bear root, but must be well soaked after it is planted. It is hardy where winter weather is not too dry. ### THE TAXUS OR YEW

There is no doubt that at the present time there is no better evergreen in this country than the different varieties of Yews. They can be planted almost anywhere and can stand all kinds of weather including dry, and they also grow well in shade. They can be used for all types of planting and make the finest hedges. I am offering several varieties, all hardy; also two new ones brought in the trade by me several years ago and which are well tried by now and highly recommended.

I'd like to bring your attention to the rt. ctgs. and one year ctgs. from 2 1/4" pot which will give you ideal stock for late planting and much safer to set out in field.

All rooted cuttings are strong, sturdy branches and not just slips. They can compare with many sold as one year transplants. All Taxus cuttings are transplanted in a mixture of sand and peatmoss after rooting to give a better and stronger root system for safe plantings. All ctgs. will be ready for shipment about April 1st. Ask for price on large quantities.

**TERMS:** Cash before shipment or C.O.D. 5% discount for cash with order and free packing. All samples at cost. A cash deposit on all orders for Spring to be arranged. All stock unsold by failure of crop or causes beyond control.

If you come to Long Island or New York, visit us. Follow the Grand Central and Northern State Parkway East to Exit No. 31, then turn Right to next traffic light. Then left onto Westbury Avenue and follow this for about 1 mile.
